

Period / Scope of this Report

Editorial Policy

This report is published annually for the member companies of Japan Pharmaceutical Manufacturers Association (JPMA), as well as for the wider public. It aims to inform of the Environment & Safety Committee's policies, targets and activities for environmental conservation, as well as about occupational safety and health. It is our hope, through the collation and disclosing of overall status of the action plans agreed upon internally by the committee and by external parties at the general meeting, to fulfill our responsibility as a part of society by receiving opinions of the outcome of these actions from in and out of association. In doing so, the level of future action can be raised.

Period and Scope of This Report

● **Period** : The performance data are collated from the figures provided by JPMA member companies. The data collection period is the FY 2005 (April 1, 2005-March 31, 2006). Latest information on each group's activities up to November 2006 may be included.

● **Scope** : Data in the performance reports from JPMA member companies are gathered and analyzed by each Technical Group, and compiled by steering committee. Please note that range of performance data collection differs for each document (data will be found on the relevant page).

JPMA membership change : There are currently 74 member firms (as of October 1, 2006), a decrease by one from the 75 in October of 2005. Please refer to the list of member companies on page 25.

Date of Publication

Date of publication: December 2006 (Next publication: To be December 2007)

This report is also available on JPMA website.
