

# DOING OUR PART: COMPREHENSIVE EFFORTS TO FIGHT NEGLECTED TROPICAL DISEASES (NTDs)

## Scaling up access to existing treatments

*Donation of 14 billion treatments over 10 years to help eliminate or control 10 NTDs*

## Strengthening health systems

*Over 40 health partnerships to build capacity to fight NTDs where they are endemic*

## Boosting innovation

*109 active R&D projects to develop the next generation of medicines and vaccines for NTDs*

NTDs require a multi-stakeholder approach to drive further research tailored to developing needs, improve health policies and access to treatments, and boost healthcare system capacity. That is why the R&D biopharmaceutical industry combats NTDs in an integrated manner.
